

Szczecin, 3th December 2021r.

Refers to: Questions from Contractors - applies to task „**Taking of aerial thermal photographs of the heating network owned by SEC Sp. z o.o.**”

Question no. 1

Are there any closed objects in the area of interest?, as defined in Art. 2 Item 9 of the Act of 17 May 1989. Geodetic and Cartographic Law.

I'm talking about restricted areas, where implementation with access to classified information with the "confidential/secret" clause is required.

Answer:

The Ordering Party confirms that the heating networks scheduled to be covered by thermal flights are also located in closed facilities. At the same time Ordering Party informs that, according to its knowledge, no special consent is required to perform thermal flights of the heating network over closed facilities located in the city of Szczecin.
